

1. Place: Bangkok Thailand
2. Term: 12th March~6th September
3. school name: Wall Street. Kamol Sukosol Building, 317 Silom Rd, Silom, Bangrak, Bangkok, Thailand

I studied English in Thailand. I studied that using the computer is the main part of my school. First I listened to English story. After that I read it. Secondly I solve English questions about this story. Finally English teacher did test and checked my answer. If I couldn't understand this question, my teacher thought it. There were 2 or 3 peoples in this test. After the examination, I got the results of an examination. And I took a speaking class. We discussed about many themes. I took many speaking classes in my school.

Many parties were often held in school a weekend. I talked with various countries people in this party. Bangkok was an international city in which many countries people. I was looking forward speaking them.

I worried about studying English in Bangkok. However Wall street use same studying system in the world. And all teachers are native speaker. I could study English without a foreign accent.

I studied Thai language. I had many friends speaking Japanese. Many Thai people studied Japanese. They spoke Japanese fluently. I decided to be influenced by them and to study Thai language. I studied Thai language 3hours in a day. I had to speak Thai many times because There were 3 people in my class. I started to study Thai as soon as I could speak a simple sentence. I worried about confusing English and Thai at first. But Thai class didn't have homework so, I could study English and Thai. There was language which cannot be pronounced in Japanese in Thai language. And Thai language had the five tones. It was too hard to speak different tones. But it was very pleasant to study Thai language. I couldn't talk to shop assistant in local store or taxi driver before I started to study Thai language. So, I was always it worried whether it arrives at the destination. After that I changed it so I can understand Thai language. English or Chinese could use many countries. But Thai language could use only Thai. However Thai had accomplished remarkable economic growth in several years. I thought that the time when my Thai language can be employed efficiently some day comes.

I lived in Thai and my future idea changed. I met the Japanese woman who is working for Thai in large numbers. They were wonderful women. I came to think that I

would also like to see them and to work for Thailand. They choose Thai and was working by themselves. So they had a dream and hope. I would also like to become like them. Consequently I had to study Thai language more and more.

I thought that I could speak English until it goes to Thai. It was a big mistake. I couldn't understand the teacher's talk. I was shocked it very much. I went into school and got the friend immediately. My friends talked me many times. But I didn't speak English well. So, I wrote something to ask to the note before I went to school. I could use English because I wanted to speak friends more and more. And I can spoke English step by step.

I decided to go to Thailand. I didn't study only English but also playing football. I have been playing football from childhood. When I searched a place to study abroad, I heard that Japanese woman's football player is in Thailand. I thought I try to become a football player. I went to Thailand and left for about two weeks. I was looking for football team. It was too difficult, because I didn't have connections. But I didn't give up it. After that I could take team tryout test. This team has many Thailand national team players. I thought that I was the only one chance and played hard. As a result I was accepted this professional football team as a trainee. But I couldn't continue playing football because I had to go to English school. It was a pity that I didn't become a football player. However this was quite a beautiful experience for me. It was too difficult to communicate team mates in English. Since I had this experience, I studied English hard. After that I played football many times with people of various countries. I studied English and Thai language trough playing football.

By having played football, I had much new encounter. I have not ever seen a wonderful Japanese man. He was a professional football player in Thailand, Uganda and Bangladesh. In fact, he does not have a left hand by nature. I met him and changed my idea to a disabled person. I surprised at his cheerful character and positive attitude. Now, he established his football school and he teaches football at an orphanage and a school for the blind in Thailand. He said " I could become a football player. If a dream is not given up, it certainly fulfills. I want to tell many children to have a dream." When I met him first time, I was used to Thai life. I was negligent of my study. But I thought that he would hear his talk and I would study more.

I had many good experiences in my Thai life. I saw many beggar children in Thailand. I couldn't forget the boy. He was in a main street. He was in there without

wearing shoes every day. If it was a heavy rain, he was still there. It was a spectacle which cannot be considered in Japan. Bangkok has become very prosperous recently. The other side, there is a tremendous gap between the rich and the poor in Bangkok. I realized it again.

Unless these experiences lived in Thailand, I couldn't have them. I have grown greatly by having gone to Thailand. And I would like to lead the remaining school life, without forgetting these experiences.
